ACTIONS FOR ISOLATION SCHOOL FLOW CHART

Stay home for at least 5 days, regardless of vaccination status, previous infection, or symptoms.

- When in isolation, you must wear a highly protective mask around others even in your own home. If you
 end isolation after Day 5, it is strongly recommended that you wear a mask through Day 10. Staff are
 required to mask through day 10.
- ii. Antigen test preferred.
- iii. If you still have a fever or your other COVID-19 symptoms are not improving, stay in isolation & talk with your doctor. If you are immunocompromised or had severe COVID-19, you may need to isolate for longer. Talk with doctor about when you can be around others.

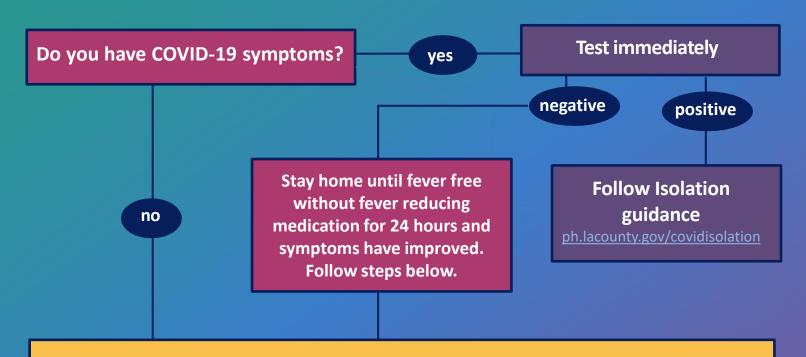

For more information, visit ph.lacounty.gov/covidisolation.

- Tell your close contacts that they have been exposed and need to follow instructions at ph.lacounty.gov/covidcontacts
- See full isolation instructions for people with COVID-19 at ph.lacounty.gov/covidisolation

ACTIONS FOR CLOSE CONTACTS SCHOOL FLOW CHART

In school settings, you are a "close contact" if you shared the same indoor airspace OR were within 6 feet of someone with COVID-19 for a total of 15 minutes or more over a 24-hour period while they were infectious.

If you are a close contact and do not have symptoms, you DO NOT need to quarantine but are <u>required</u> to take the following steps to reduce the risk of spreading COVID-19 to others.*

- 1. **Monitor symptoms** for 10 days. If you develop symptoms, you need to test immediately. If positive, follow isolation guidance at <u>ph.lacounty.gov/covidisolation</u>.
- 2. Wear a <u>highly protective mask</u> around others indoors, except when eating or drinking, for 10 days after the last date of exposure. More details at <u>ph.lacounty.gov/masks</u>.
- 3. **Test** with an FDA-authorized viral COVID-19 test (e.g., PCR or Antigen test, including at home tests) within 3-5 days since the last date of exposure.**
 - **If you had COVID-19 in the past 90 days, you do not need to test unless you develop symptoms.

*If applying the within 6 ft of an infected person for 15 minutes or more over a 24-hour period definition for close contacts in classrooms or similar-sized settings, all other individuals who shared the same indoor airspace with the infected person for 15 minutes or more over a 24-hour period are strongly recommended to follow the above guidance for symptom monitoring, masking, and testing.
